

# IQMS — Integrated Quality Management System

ISO 9001 · ISO 14001 · ISO 45001

The Integrated Quality Management System (IQMS) is a modern framework that unifies quality, environmental and occupational health & safety management into a single, efficient structure for industrial organizations.

## Key Benefits

- 30% reduction in audit time
- 20% increase in productivity
- 100% process transparency
- 95% customer satisfaction
- Elimination of duplicate audits and lower costs
- Stronger competitive edge in global markets

## Implementation Process

|   |                                   |
|---|-----------------------------------|
| 1 | Initial assessment & gap analysis |
| 2 | Integrated structure design       |
| 3 | Training & enablement             |
| 4 | Execution & operationalization    |
| 5 | Internal audit & review           |
| 6 | Certification                     |
